

MULTITEK[®]
NORTH AMERICA, LLC

Wide Log Processing Area with Log Flippers

Optional 3 Cylinder Diesel Engine

Heavy Gauge Tubular Alloy Steel Construction

Intuitive Operator Joystick Controls

From Logs to Split Firewood Fast....!

MULTITEK MODEL 1616EZ FIREWOOD PROCESSOR

The Multitek Model 1616EZ Firewood Processor boasts a 3-strand hydraulic folding live deck for processing logs out to 20' in length up to 16" in diameter. This industry workhorse has features that well suit the growing firewood producer. With an ultra fast 5.0 splitter cycle time and 18 tons of splitting force, the machine operator can quickly and easily produce cut and split firewood through the hydraulically adjustable 4-way or 6-way wedges.

Increase production and reduce labor costs with the economical 1616EZ firewood processor. The 1616EZ features a patented hydraulic cut off saw system that increases the speed of the up and down motion of the bar and chain while it is not cutting the log. The system then adjusts to an ultra fast cut speed upon impact of the log. This proven system found on Multitek firewood processors increases the speed of the saw cycle, therefore increasing the overall operator productivity. The 1616EZ lubricates with conventional bar oil for consistent bar oiling and extended bar and chain life.

Outstanding features of the Model 1616EZ include, a 3-strand hydraulic powered live deck that lifts hydraulically for transport, standard operator joysticks, hydraulically adjustable splitter system, electric brakes, and a standard tow package. Engine options include: 28 hp Subaru gas, 25 hp Yanmar Diesel, 25 hp Kubota Diesel, and 3-phase electric powered motor. The machine is manufactured in the USA of American made components and is built for years of reliable service life.

This one operator, highly mobile machine will quickly provide income for your firewood business, mobile firewood processing company, and provide great sideline income to add to your seasonal tree service business, landscaping company, sawmill, or logging company.

1616EZ

MULTITEK Firewood Processors & Conveyors
are manufactured in the U.S.A. of the highest quality materials.

FIREWOOD PROCESSOR MODEL 1616EZ

PERFORMANCE:

- Production Rating 1.5 - 2.5 Full Cords per Hour
- Splitter Cycle Time 5.5 Seconds
- Maximum Log Length 20'
- Maximum Log Diameter 16"
- Minimum Log Diameter 3"
- 24" Splitting Chamber

SPECIFICATIONS:

- Engine Options: 28 hp Subaru Gas Engine, 25 hp Yanmar Diesel, 25 hp Kubota Diesel
- Transport Length: 22'
- Towing Width 6'9"
- Weight 4,000 lbs

PROCESSOR OPTIONS:

- Integrate 13' conveyor
- Separate 20' or 30' conveyors
- Night Processing Light Kit
- Operator Seat

13' Folding Conveyor System

Folds Up Quickly and Compactly for Transport

Comfortable Operator Seat

Multitek is a pioneer of quality fuelwood processing equipment and has been designing and manufacturing firewood processors for 30 years. Multitek Firewood Processors are the only firewood processors in the world for handling and processing low grade crooked hardwood logs. Only the larger models have the unique patented shuttle-grapple which make it possible for you to efficiently produce firewood from low grade logs.
